

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Ready for delivery for the Fall Term in Colleges and Universities

TABLES FOR APPLIED MATHEMATICS TO FINANCE, INSURANCE, STATISTICS

EDITED BY

JAMES W. GLOVER, Ph.D.,

Professor of Mathematics and Insurance, University of Michigan

Enter your order NOW for copy on ten days' free examination of "Glover's Tables" when ready

620 pages

6 by 9 inches

Cloth, \$3.90 postpaid

It comprises in one book all tables required by students in college and university classes in mathematics of finance, insurance and statistics. It is printed in clear telephone type on good paper and bound in cloth in durable form for hard use. The book is free from text and suitable for use in the examination room as well as during the regular class exercises. The logarithmic tables are designed to facilitate the work of computation where arithmometers are not available and to familiarize the student with the use of seven place logarithms. The following synopsis will give an idea of the contents.

PART I. INTEREST TABLES. 250 pages.

Eight place compound interest functions and seven place logarithms of compound interest functions for the six fundamental functions for twenty-eight rates of interest. Twelve rates under $1\frac{1}{8}\%$, inclusive, run from 1 to 200 years and sixteen rates over $1\frac{1}{8}\%$ run from 1 to 100 years. Twelve pages of fractional functions serve to convert installment interest functions into the regular tabular forms for all rates of interest and for values of p equal to 2, 3, 4, 6, 12, 13, 26, 52, 365, ∞ . Log (1 i) to twenty places of decimals for multiples of $\frac{1}{24}$, $\frac{1}{20}$, and $\frac{1}{16}$ of 1% up to 10% for fundamental calculations.

PART II. INSURANCE TABLES. 100 pages.

American Experience table of mortality and derived functions; commutation columns, valuation columns, 3%, $3\frac{1}{2}\%$, 4%, single and annual premiums and annuities, 4%; five fundamental tables from ages 15 to 95 and from 1 to 50 years, at 4%, viz.: accumulated value of 1, forborne life annuity due, single premium endowment insurance, single premium temporary insurance, temporary life annuity due; Hunter's total and permanent disability tables and commutation columns, 3%, for disability before age 60 and before age 65; Hunter's Makehamized American Experience table of mortality; commutation columns, valuation columns, single premiums, annual premiums and annuities for two joint lives, equal ages, $3\frac{1}{2}\%$; United States Life Tables for white males and for white females in the original registration states: 1910, with commutation columns at 5%.

PART III. TABLES FOR STATISTICIANS AND BIOMETRICIANS. 80 pages.

Areas, ordinates, and second to eighth derivatives of the normal curve of error to five places of decimals from $t = 0$ to $t = 5$ by intervals of .01; Newton's binomial, Stirling's central difference, and Bessel's interpolation coefficients for the function and the first derivative; powers of numbers; roots and reciprocals and sums of reciprocals of numbers; extensive exponential growth curve tables; seven place logarithms of the Gamma Function, of the number of combinations of n things r at a time to $n = 64$, of factorial n to $n = 1000$, and so on.

PART IV. LOGARITHMS. 190 pages.

Seven place tables of common logarithms from 1 to 100,000; table for conversion of common into natural and natural into common logarithms, table of constants frequently used in applied mathematics.

Michigan

CONTENTS

Sixth Annual Meeting of the Mathematical Association of America. By Professor W. D. CAIRNS.....	97
Serret's Analogue of Desargue's Theorem. By Professor H. S. WHITE....	111
A Certain Two-Dimensional Locus. By Dr. J. L. WALSH.....	112
Among My Autographs: 20. Babbage visits Mme. Laplace; 21. DeMorgan and the Libri Controversy. By Professor D. E. SMITH.....	114
QUESTIONS AND DISCUSSIONS: Questions—44, replies by Professor R. E. GILMAN and Professor OLIVE C. HAZLETT, note by the Editor. Discussions—"A method of deriving formulæ for the expansion of $\sin(x+y)$ and $\cos(x+y)$ " by Mr. H. E. WEBB; Remarks by Professor A. A. BENNETT; "The derivation of formulæ in the mathematics of investment" by Professor C. N. REYNOLDS, Jr.....	116
RECENT PUBLICATIONS: Reviews by Professor D. E. SMITH and Professor A. A. BENNETT. Articles in Current Periodicals.....	123
PROBLEMS AND SOLUTIONS: Problems for Solution—2959-2965. Solutions—2824, 2834, 2851, 2862, 2865, 2869.....	129
NOTES AND NEWS.....	136

EDITORIAL CORRESPONDENCE AND BOOKS FOR REVIEW should be addressed to the EDITOR-IN-CHIEF, A. A. BENNETT, University of Texas, Austin, Texas.

BUSINESS CORRESPONDENCE should be addressed to the SECRETARY-TREASURER of the Association, W. D. CAIRNS, Oberlin, Ohio.

Seventh Summer Meeting of the Association, University of Rochester, September 6-7, 1922

Seventh Annual Meeting, Harvard University, December, 1922

The following are dates of Section meetings of the Association in 1921 (unless otherwise specified):

TEXAS, Dallas, November 25; Houston, December 1-2 1922,
ILLINOIS, Rockford, Ill., April 28-29, 1922
IOWA, Simpson College, Indianola, April 30;
Des Moines, November 4
KANSAS, Topeka, January 21, 1922; University of Kentucky, January, 1923
KENTUCKY, University of Kentucky, May 7;
Georgetown College, April 8, 1922
MARYLAND-DISTRICT OF COLUMBIA-VIRGINIA, Annapolis, May 13, 1922; Washington, December, 1922

MINNESOTA, St. Paul, June 4; Macalester College, St. Paul, May 27, 1922.
MISSOURI, Washington University and Soldan High School, St. Louis, November 25-26; Kansas City, November, 1922
OHIO, Columbus, March 25-26; Columbus, April 14-15, 1922
ROCKY MOUNTAIN, Denver, March 25-26; Greeley, Colo., April 14-15, 1922
SOUTHEASTERN, Atlanta, Ga., April 29, 1922
TEXAS, Dallas, November 25; Houston, December 1-2, 1922

DESIRED COPIES OF THE MONTHLY

Through an oversight the Association has not reserved a sufficient number of copies of the Monthly for October, 1920 and for August-September and October, 1921. Cash, or credit toward future dues, will be given by the Secretary for such copies at the rate of forty-five cents per copy, up to a limited number of copies.

Extra copies or volumes of any dates which members wish to contribute will be used to the best advantage of the Association.

Address all communications to the Secretary, W. D. Cairns, Oberlin, Ohio.

THE NEW ERA PRINTING COMPANY

LANCASTER, PA.

Is prepared to execute in first-class and satisfactory manner all kinds of printing and electrotyping. Particular attention given to the work of Schools, Colleges, Universities, and Public Institutions.

Books, Periodicals

Technical and Scientific Publications

Monographs, Theses, Catalogues

Announcements, Reports, etc.

All Kinds of Commercial Work

(Printers of the Bulletin and Transactions of the American Mathematical Society, etc., etc.)

Publishers will find our product ranking with the best in workmanship and material, at satisfactory prices. Our imprint may be found on a number of high-class Technical and Scientific Books and Periodicals. Correspondence solicited. Estimates furnished.

THE NEW ERA PRINTING COMPANY

WILEY MATHEMATICAL BOOKS

Graphical and Mechanical Computation

By **JOSEPH LIPKA**, Ph.D., Assistant Professor of Mathematics, Massachusetts Institute of Technology.

With the assistance of this book engineering problems of every description can be solved, quickly and accurately. Illustrative examples are given, worked out in full, with folded charts which will prove indispensable to every designer of alignment charts, and affording a ready means of obtaining evenly divided or logarithmically divided scales of various lengths.

264 pages. 6 by 9. 205 figures. Cloth, \$4.00 postpaid.

A Manual of Mathematics

By **RALPH G. HUDSON**, S.B., Assistant Professor of Electrical Engineering, Massachusetts Institute of Technology, and **JOSEPH LIPKA**, Ph.D.

A collection of mathematical tables and formulas covering the subjects of algebra, trigonometry, mensuration, analytical geometry, calculus, differential equations and hyperbolic functions, arranged for quick reference.

132 pages. 5 by 7½. 95 figures. Flexible binding, \$1.50 postpaid.

The Engineer's Manual

By **RALPH G. HUDSON**, S.B., assisted by **JOSEPH LIPKA**, Ph.D., **HOWARD B. LUTHER**, S.B., Dipl. Ing., and **DEAN PEABODY**, Jr., S.B., all of the Massachusetts Institute of Technology.

This book gives the more commonly used formulas of engineering, each arranged with a statement of its application. It has had a remarkably fine sale, and is universally recognized as a standard, practical work in its field.

315 pages. 5 by 7½. 227 figures. Flexible binding, \$2.75 postpaid.

This Book is Receiving High Commendation

FIRST COURSE IN THE THEORY OF EQUATIONS

By **LEONARD EUGENE DICKSON**, Ph.D., Professor of Mathematics in the University of Chicago.

This text-book gives that knowledge of the theory of equations which is a necessity in the subsequent mathematical courses.

168 pages. 6 by 9 inches. 26 figures. Cloth, \$1.85 postpaid.

Send for any Wiley book on Free Examination.
